

SHOFWAN ALI SANTOSA

Web Fullstack Developer | D3 Informatics Management Student, State Polytechnic of Malang (Kediri Campus)

Jl. Angkasa Gang II No. 10, Bandar Kidul, Mojoroto, Kediri City | 0813-3597-4917 | alisshofwan@gmail.com | shafwoon.my.id

SUMMARY

D3 Informatics Management student at the State Polytechnic of Malang (Kediri Campus) with a focus on Web Fullstack Development. Proficient in native PHP as well as back-end frameworks Laravel and CodeIgniter 4, combined with React.js and Node.js for modern front-end and back-end development. Has a solid foundation in Python and is experienced in designing MySQL database structures. Experienced in executing various end-to-end IT projects, both independently and in team collaboration. An adaptive and tech-savvy talent who proactively integrates Artificial Intelligence (AI) technology into the development workflow to accelerate code writing, improve troubleshooting efficiency, and deepen the understanding of technical concepts.

ACADEMIC EXPERIENCE (PROJECT BASED LEARNING)

Alfatindo – Warehouse Management System | Group Project (5 members)

- Developed a Laravel-based inventory management website.
- Implemented real-time stock in/out recording features.
- Designed a management system for supplier and item category data.
- Responsible for back-end development and database structure design.
- Collaborated with the team to ensure the system workflow met warehouse users' needs.

CM Sport – Sports Equipment Buy & Sell System | Group Project (3 members)

- Developed a Laravel-based e-commerce website.
- Implemented product management, transaction, and user authentication features.
- Responsible for back-end development and database structure design.
